P.O. Box 689  
Muskegon, MI 49443

#93-7

Dear Mr. Cleveringa:

Modification of the Certification of the EBW #705 Spill Boxes

You requested a modification to the certification of the EBW #705 series spill containment manholes (approval letter #93-4). In an effort to clarify your part numbering system, you are planning to change the part numbers that have been assigned to your spill containment manholes. The manholes affected which have already been certified by CARB are as follows:

705-442	5 gallon with push drain would not change	
705-443	15 gallon with push drain would change to	715-443
705-444	25 gallon with push drain would change to	725-444
705-445	5 gallon with cover actuated drain would not change	
705-446	15 gallon with cover actuated drain would change to	715-446
705-447	25 gallon with cover actuated drain would change to	725-447
705-456	15 gallon with cover actuated drain would change to	715-456

I find that since the above listed #705 series spill boxes themselves will not change, just their part numbers, they will not adversely affect vapor recovery systems on which they may be installed. Therefore, approval letter #93-4 is modified to include the above listed spill containment manholes for use with CARB-certified Phase I vapor recovery systems. If you have any questions, please call Basharat Iqbal at (916) 324-7343 or Laura McKinney at (916) 327-1525.

Sincerely,

James J. Morgester, Chief  
Compliance Division
